

The Leader in Trenchless Lateral and Vertical CIPP Rehab Systems

With our innovative lining system, you can deliver results that are more effective than the traditional dig-and-replace.

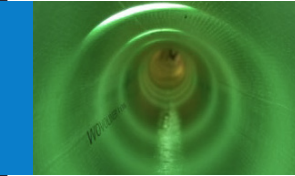

All of our liners are manufactured by our parent company, United Felts, the **world's longest standing CIPP manufacturer in the world**. Every liner manufactured goes through a rigorous quality inspection process consistency and a superior product with each liner.

You also have a choice of resins, carefully matched to the requirements of the liner and your job specs.

The MaxLiner Tech Services team represents the **industry's most experienced professionals** to train, troubleshoot and provide field support every step of the way.

THE INDUSTRY'S MOST COMPREHENSIVE SOLUTION, USING BEST-IN-CLASS MATERIALS AND EXCEPTIONALLY DEPENDABLE EQUIPMENT.

The MaxLiner System

LINERS & MAX CALTUBES

MaxLiner offers an assortment of liner options up to 12" in diameter to fit your project requirements.

- Max Scrim Liner
- Max Flex Liner
- Max Super Flex
- Max Flex 4D
- Max Wovoliner
- Max CalTube Family

RESINS

MaxLiner offers several different resin combinations to fit your project requirements.

- Resins to choose from:**
- MaxPox® Resin family
 - Max VertiPox®
 - MaxLight® - UV

UNITED POINT REPAIR

We offer three different silicate resins designed for fast (Turbo), medium (Winter) and slow (Summer) cure times, depending on the season and/or project conditions.

- 3"-72" diameter pipe
- 24" and 48" lengths
- Contains no VOCs, PFAs or styrenes
- Kit and bulk packages available

MAXICure

Innovative and versatile LED CIPP Curing System for sewer laterals and small diameter mains. It is effective for both pre-impregnated pull-in liners, as well as onsite wet-out and prepped, inversion liners.

- 600w-1200w LED Lamps
- 3"-12"
- Two 600w LED lamps
- Nominal Diameters — 3"-20" (75-500 mm)
- Cable reel with 229' (70 m) of supply hose

ROBOTIC CUTTERS

Choose from three models to use in pipes ranging from 3"-10" | DN80 - DN250 and are best for house-to-main connections.

- Models Micro S Light, Micro S Automatic, Nano Easy
- Works in pipe, as small as 3" | DN80, with bends up to 90°
- Maximum mobility, endless rotation of the cutting head

INVERSION & CURING EQUIPMENT

Choose from Maxliner's lightweight by rugged line-up of liner drums, shooters, curing and calibration equipment to reline verticals and laterals from 2"-12".

- Max LinerDrum, Max Shooter, Max Linergun
- Air, steam, water and UV
- Horizontal and vertical applications
- 2"-12" (DN50-DN300)

PICOTE CLEANING & COATING EQUIPMENT

Choose from Picote Millers, and all their accessories, to the new Xpress Coating System.

- Maxi, midi, and mini millers
- Chains, spiders, grinders and more
- Xpress System for 1.5"-12" (DN32-DN300) pipes
